

MASTER OF SCIENCE IN APPLIED GEOLOGY (Non-Research CATEGORY)

The Master of Science in Applied Geology is a one-year program leading to enhanced knowledge in Mineral Exploration/Resource Geology or Geological Engineering. The program normally commences in September and can be completed by the end of the following year depending on the project and/or pattern.

APPLICATION PROCESS

Potential supervisors must be contacted prior to admission into the program. Applicants can find the list of available supervisors on the departmental web site. The Department limits the number of students into the program, subject to the availability of supervisors. In addition to the normal academic qualifications required for entry to a Master's program, the Applied Geology program requires that candidates should have previous geological/geoengineering experience. 13perm660. Glin

The requirements for Option 2: a student is required to complete eight term length course credits. At least four courses must be taken in the Department of Geological Sciences & Geological Engineering.

Selection of courses in both the Pattern I and II programs is subject to Supervisor and Graduate Coordinator approval.

Students must obtain a satisfactory standing in all courses (minimum 70%) in both the Pattern I and II programs.
