

Bruce Campeau

Can you see that math can be  
Something beautiful for you and me  
In so many ways  
In so many ways

Counting sheep to help you sleep  
How many feet is the deep end deep?  
The deep end deep?

Slicing pies to equal size  
Proportionality before your eyes  
Before your eyes

Can you see what math can be?  
Can you see?

Multiply your happiness  
Share it round with all the rest  
Not just you and me! everybody

Can you see what math can be?  
Can you see what math can be?

Powers of ten again and again  
Positive numbers adding more friends  
Powers of ten again and again  
Positive numbers adding more friends

Can you see what math can be?  
Something beautiful for you and me  
and everybody! everybody

Can you see?  
Can you see?
